Principal Hazardous Component (s)	(Chemical and Common Name (s))	%	Threshold Limit Value (units)	
This material has not been evaluated as a whole. All ingredients are bound in a polymer matrix and potential for hazardous exposure as shipped is minimal. However, some fumes may be released upon heating and the end-user (fabricator) must take the necessary precautions (mechanical ventilation, respirator program, etc.) to protect his employees from exposure. (See Section 8 - Special Precautions.) The following ingredients are considered hazardous per OSHA 1910.1200:				
	Metallic Powder		Nuisance dust	
If Chemical is not specifically identified, it is considered proprietary.
